Walking Map of Historic Monona

Created by: Dylan Osborn

NORTH → 0 0.25 0.5 Miles

Walking Map of Monona displays significant historical, cultural and architectural sites in the town of Monona. All sites were hand picked because of their importance to the community, unique architectural style, and cultural relationship to the area. In this map I have displayed the parcel location of each area and a historical photo. There are also custom symbols for each location to symbolize the architectural style and site. The legend above and the Walking Map of Historic Monona Booklet will help guide you through the Walking Map of Historic Monona.

Cultural and Native American Relation

Map Color:

Knute Reindahl House -- Historical Land Mark

Location: 4009 Monona Dr.

Year Built: 1903

Map Symbol:

ABOUT THE UNIVERCITY YEAR

UniverCity Year is a year-long partnership between UW-Madison and one community in Wisconsin. The community partner identifies sustainability and livability projects that would benefit from UW-Madison expertise. Faculty from across the university incorporate these projects into their courses with graduate students and upper-level undergraduate students. UniverCity Year staff provide administrative support to faculty, students and the partner community to ensure the collaboration's success. The result is on-the-ground impact and momentum for a community working toward a more sustainable and livable future.
